Soil Activator AridGrow® LHSA-C

is not a fertilizer, but a highly concentrated, complex, ecologically pure organic liquid **AMELIORANT-SOIL CONDITIONER OF A LONG LASTING EFFECT**, based on Humic Substances, allocated from Peat on special AridGrow® Technology. It acts for a long period of time activating agrophysical and agrochemical processes in the soils in an environmentally safe manner at the molecular level and extirpation with their salinization.

APPLIED FOR: melioration of sandy soils and for fertility restoration of all soil types, disturbed by human activities, contaminated with heavy metals (radionuclides), agricultural chemicals and soil salinization; for desertification & creation of various oases; restoration of the arid, exhausted & salinized soils; landscape designing and decorative green construction; planting of trees, bushes & green hedges along highways; cultivation of green lawns, flower beds & vegetative plantations; growing of decorative floral in domestic & public gardens both indoor and outdoor etc.

IN ORGANIC AGRICULTURE for growing different floral, decorative, vegetables, berries, fruit, cereals and other crops in the open field and greenhouse for the root & foliar feeding, drip irrigation, spraying and pre-sowing treatment, producing of ecologically pure agricultural products, improve its quality, taste and consumer characteristics, increase yield harvesting.

**BEFORE APPLICATION 1 LITER OF A CONCENTRATE
MUST BE DILUTED IN 100 LITERS OF WATER!**

APPLICATION: dilute concentrate SOIL ACTIVATOR AridGrow® in irrigation water in a ratio 1: 100 and treat the soil and/or the plants **THREE TIMES** at 14 DAYS interval. **For more details please visit www.aridgrow-us.com**

RESULTS: improve seeds germination, stimulate growth and development, raise numbers of wealthy sprouting, branches, buds, leaves & flowers, increase resistance to disease, wilt, heat and frost, accelerate and extend budding and abundant blooming, intensity and brightness of leaves and flowers, increase size and mass of fruits, yielding capacity, reduce time of maturation, improves product quality.
